

## STATE ONE - CARRIBBEAN MAP

**\*MAP FEATURE:** A map graphic with dynamic elements. Each departure airport is marked by a star and displays name, a flight pattern graph, and flight duration. The admin can add a new flight in the CMS. When the user clicks (or hovers) on one of the stars, the map zooms in to our pre-configured zoom for that item, the flight pattern (airplane) animates from the departure airport to Curaçao, then fades in the flight details (data). Optional: A “back to full size” button that then fades out the data and unzooms to the main view.

## STATE ONE - CARRIBBEAN MAP (HOVER STATE)

| \*MAP FEATURE: When hovered on Curacao the ABC Islands enlarge and a pop up box comes up

## STATE TWO - WORLD MAP VIEW

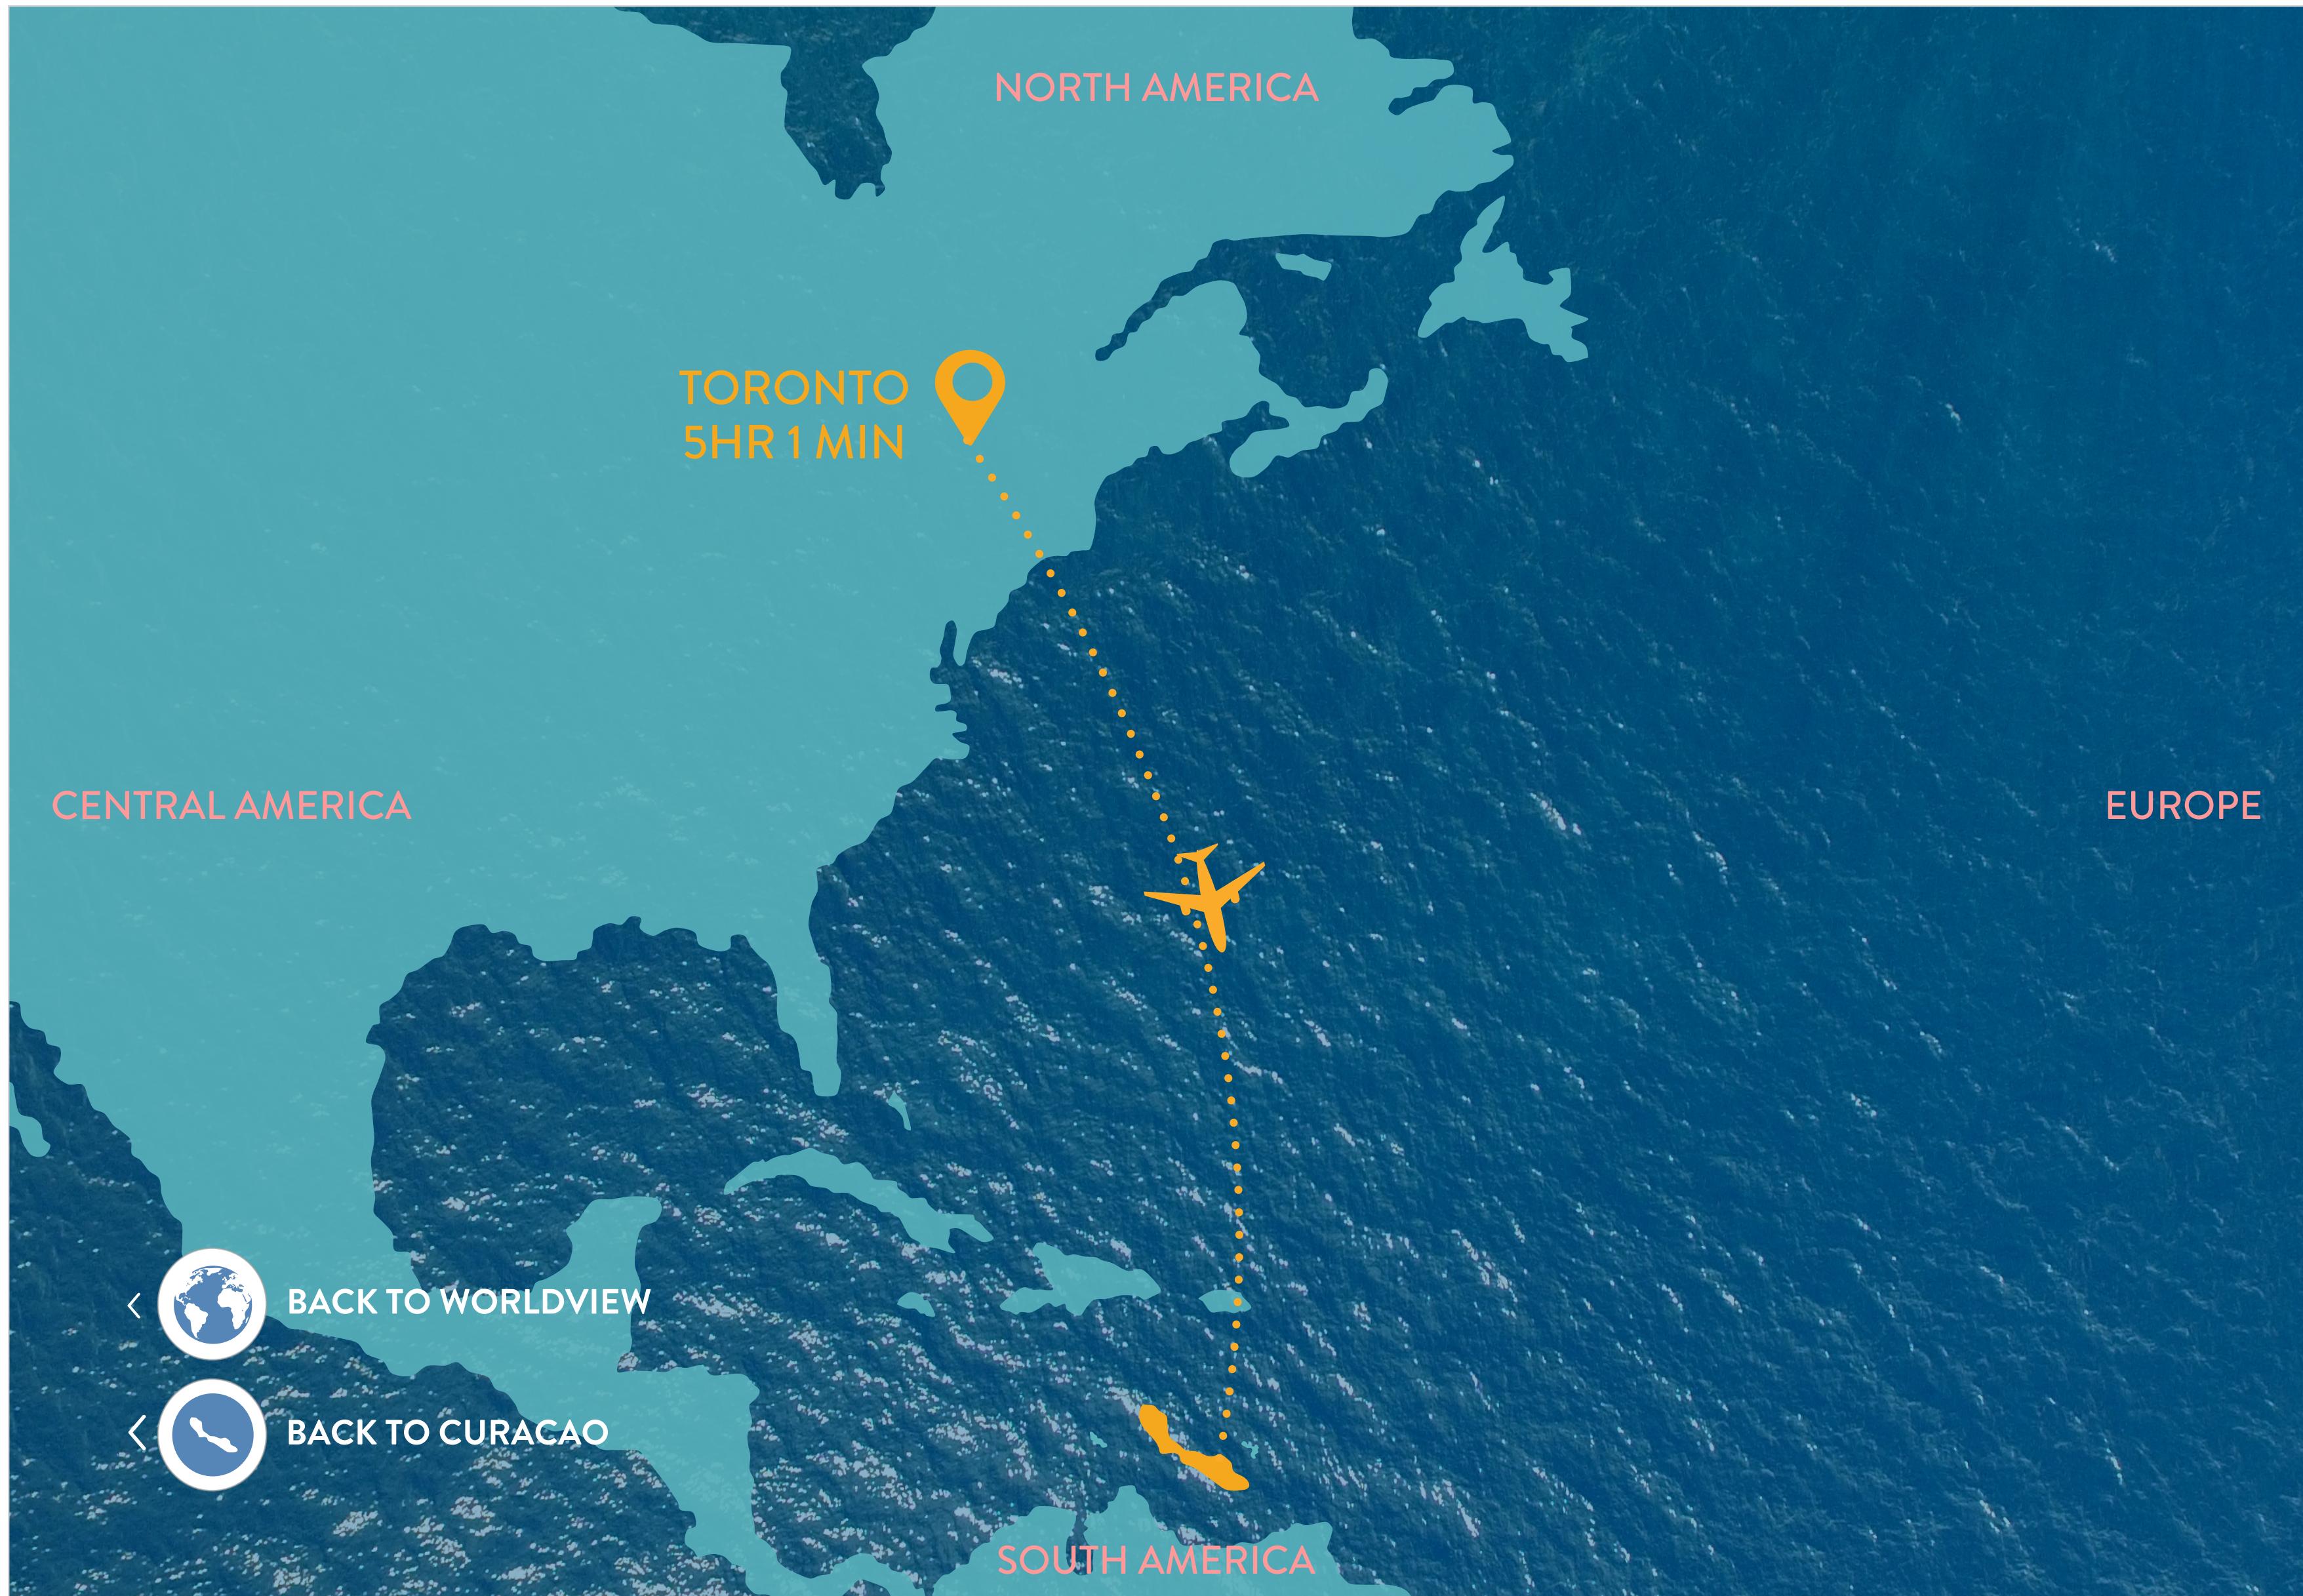

\*MAP FEATURE: Click on a map pin to zoom into your location

## STATE TWO - WORLD MAP (HOVER STATE)

\*MAP FEATURE: When hovered upon the map pin enlarges and changes color, the location pops up and when click off hover the pin turns back to pink and the location disappears

## STATE THREE - DETAILED VIEW

**\*MAP FEATURE:** When pin is clicked, the screen zooms in on specific location from there an animated flight path appears with plane flying to Curacao, the duration of your flight is also shown all other location pins will disappear from there you have the option to go back to the worldview or back to the original map of Caribbean
